

Directory of non-medical latex-free product alternatives

If you come across any new information or have information which will update this list, please contact us: info@anaphylaxis.org.uk

Every effort has been made by the Campaign to ensure that this list is accurate and up to date. However, it is obviously incomplete, and possible that some items could be incorrectly listed.

This list is intended for guidance only and is intended to assist those wishing to identify whether any non-medical product does or does not contain latex. Please do not rely entirely on this list.

We would strongly advise anybody who is interested in purchasing latex free products to obtain their own verification of the latex status of any product directly from the product supplier or manufacturer.

Supplier details can be found at the end of the product list.

Adhesives:

MAY CONTAIN LATEX:	LATEX-FREE:
<p>COPYDEX, COW GUM, BOSTIK AQUAGRIP 200, 202, 220 (which is used mainly in footwear industry and for bonding NLR clothing). ENVELOPE ADHESIVES ESP. --	---

Balloon launches:

Promotional aerial outdoor balloon launches need not cause too much concern, once the balloons are airborne. The Civil Aviation Authority authorise on average 2,500 such releases a year. They advise that by far the greatest majority of the balloons go to altitude and shatter at 8,000 - 10,000ft. Only a small number survive this to return to earth, usually in open spaces or at sea. They regard the medical risk to us therefore as small and theoretical, effectively no threat to the susceptible community.

Ballpoint pens:

<p>MAY CONTAIN LATEX:</p> <p>SOME BALLPOINT PENS (SHEATH COATING)</p>	<p>LATEX-FREE:</p> <p>All <i>Berol</i> ballpoints (PVC sheath).</p> <p>All <i>Stabilo</i> products are latex free.</p>
--	---

SHOE SOLES, RUBBER TRIMS, RUBBER SHOES OR BOOTS, DESERT BOOTS, MANY SHOES MADE IN CHINA, CREPE SOLES, PLIMSOLLS AND GYM PUMPS, NEARLY ALL TRAINING SHOE OUTER SOLES, ARCHPADS AND CHIROPODY SUPPLIES, HEEL GRIPS AND INSOLES, STIFFENERS, ODOREATERS, THONGS AND WATER SHOES, FOOTWEAR ADHESIVES USED IN MANUFACTURE, SOLES OF CHILDREN'S TAPDANCE SHOES (PVC ALTERNATIVES AVAILABLE). CLARKS CICA TRAINERS. ALL ADIDAS SHOES CONTAIN LATEX CEMENT. HUSH PUPPIES. NEXT SHOES HAVE LATEX ADHESIVES.

ALTHOUGH NIKE USES VERY LITTLE LATEX RUBBER IN THEIR MANUFACTURE, THEY CANNOT CATEGORICALLY STATE THAT ANY ONE SHOE IS LATEX FREE. IN COMMON WITH THE REST OF THE FOOTWEAR INDUSTRY, LATEX ADHESIVE IS OFTEN USED TO HOLD THE UPPER TO THE SOLE BEFORE STITCHING, BUT NIKE ARE SLOWLY PHASING THIS OUT. NLR IS STILL USED IN AUTOCLAVE SHOES WHERE THE BITS OF RUBBER ARE BONDED IN OVENS (WHICH ARE LIKE THE OLD DUNLOP GREEN FLASH) WHICH ARE GENERALLY OFF-COURT TENNIS SHOES AND SHOULD BE AVOIDED BY LATEX ALLERGICS. BUT LATEX ADHESIVES ARE NOT USED IN ANY OF THEIR SOCKLINERS/INSOLES. ALSO, MANY SHOES ARE BOARD-LASTED, MEANING THAT THERE IS CARDBOARD BETWEEN THE WEARER'S FOOT AND THE SHOE BED, MINIMISING ANY CONTACT PROBLEMS.

LATEX-FREE:

Man-made soles such as polyvinylchloride soles (PVC), polyurethane (PU), thermoplastic rubber (TR), ethylene vinyl acetate (EVA) soles. PVC boots, plastic jelly shoes.

Clarks now produce an "allergy list" detailing safe styles. Note that even footwear with synthetic soles (*Clarks* Walking Sandals, some *Clarks* children's shoes & *Clarks* Springer sandals) may use latex adhesive to glue in the sock or insole.

Many latex allergics can wear most shoes without too much difficulty, but if you are reacting, the lowest risk is unlined footwear with leather insole and non-rubber sole unit, or as a last resort having footwear made to individual specification by bespoke shoemakers.

Most *Nike* trainers, but not walking shoes, are latex-free – but check before you buy. *Nike Total 90 III* football boots for *Astroturf* are latex-free.

Crocs: *Croslite* range are latex free.

Green Shoes can make shoes free from many common allergens.

Try also *Ethical Wares* and *Vegetarian Shoes* if you have problems with some of the chemicals used in tanning leather.

Marks and Spencer are listing on most of their shoes what the constituents of the upper and sole are, but there is no indication of the glue used.

Wellington boots – some are latex, others are synthetic rubbers such as PVC or butyl. *Dunlop* make some non-latex wellies. The very shiny or brightly coloured wellies are often PVC. The retailer should be able to check with the supplier before you buy – if they can't / won't, go elsewhere!

Silk flowers: MAY CONTAIN LATEX: SILK FLOWERS - LATEX COVERED STEMS

Socks:

<p>MAY CONTAIN LATEX:</p> <p>SOCKS</p>	<p>LATEX-FREE:</p> <p>Most of <i>Marks and Spencer's</i> socks are now latex-free, but check with Head Office for product details.</p> <p><i>Dr. Scholl</i> Diabetics Socks are latex free.</p>

--	--

Tyres:

<p>MAY CONTAIN LATEX:</p> <p><u>ALL</u> PARTS OF VEHICLE TYRES CONTAIN NLR BLENDED WITH OTHER RUBBERS (BUTYL, EPDM, ISOPRENE AND STYRENE BUTADIENE RUBBER OR SBR). AS FOR COMMERCIAL VEHICLE TYRES, THE PROPORTION OF NLR INCREASES WITH VEHICLE SIZE. EG. LARGE EARTH MOVER TYRES ARE 100% NLR. LATEX ALLERGENS HAVE BEEN FOUND IN TYRE DUST, ROADSIDE DUST AND AIR SAMPLES FROM LOS ANGELES AREA, USA.</p>	<p>LATEX-FREE:</p> <p>Some solid tyres on young children's bikes.</p>
---	--

Underwear and clothing:

<p>MAY CONTAIN LATEX:</p> <p>ELASTIC IN UNDERWEAR, AND CLOTHING. SUSPENDERS AND BELTS</p>	<p>LATEX-FREE:</p> <p>Latex elastic in clothing should be safe if covered with cotton cloth or tape. Lycra, Spandex, Elastane are synthetic polymers and safe. Be careful: composition labels in garments may exclude elastics and trimmings.</p> <p>Most <i>Marks and Spencers</i> clothing and underwear is latex-free (check the label – latex should be listed if present).</p> <p>Underwear from <i>Next</i> should also be latex free.</p> <p><i>Royce Lingerie</i> have confirmed that they use elastane and not natural rubber latex.</p>
--	--

Upholstery:

<p>MAY CONTAIN LATEX:</p> <p>UPHOLSTERY FOAM RUBBER PADDING</p>	<p>LATEX-FREE:</p> <p>Synthetic foam</p> <p>The latest info we have is contradictory: "Most synthetic foams supplied for upholstery contain 1 - 2% latex as this gives better durability" and "synthetic foam doesn't contain latex, as latex foam is very expensive and has a dense, close-knit texture, as opposed to synthetic, which is open and aerated by comparison. But latex <i>can</i> be used in upholstery and mattresses."</p>
--	--

Washers:

<p>MAY CONTAIN LATEX:</p> <p>WASHERS, RUBBER SEALS, PLUMBING SEALS, PLUGS.</p>	<p>LATEX-FREE:</p>
